Ready Products Hand-Bendable Curved Framing Profiles

Visit Steeler Construction Supply and choose Ready Products when you:

- Need a same day curved framing solution
- Cannot lock down the radius
- Would like easy to use framing profiles

Our customers really appreciate how much easier and faster it is to build curved surfaces with Ready Products. They've proven time after time to be the most convenient and simple, flexible solutions for any curved shape. Once formed, Ready Products hold their shape, so they install quickly and greatly reduce your labor costs.

READY-ANGLE®

READY-HAT®

READY-TRACK®

READY-ARCH®

READY PRODUCTS

Easy to Work With | Holds its Shape | No Straps

READY-HAT™

Versatile, low profile, and economical, form Ready-Hat™ by hand on the job-site to the exact convex or concave shape you need. Secure it to concrete walls with power-driven fasteners or concrete nails. More than your average furring channel, Ready-Hat™ makes framing curved surfaces fast and easy.

APPLICATIONS – Ideal for furring on curved walls or to create coves, barrel vaults, groin vaults, soffits and serpentine ceilings. Use Ready-Hat™ to wrap columns or as cross-framing to eliminate drywall butt joints.

STANDARD SIZES – 7/8"

PROFILES AVAILABLE – in 10' lengths

READY-TRACK®

Hand-bendable Ready-Track® is the fast and dependable way to frame a curved wall while you're on the job site. Sold in straight sections, Ready-Track® holds its shape once formed, so it installs rapidly, and greatly reduces labor costs. Framing screws can be easily added on one side of each tab for additional stiffness and a permanently locked shape.

APPLICATIONS – Ideal for curved walls, soffits, clouds, even complicated compound radiused top and bottom track for curved stairwells, or any other application when you need material curved the hard way along the flange.

STANDARD SIZES – 2 1/2", 3 1/2", 3 5/8"*, 4", 5 1/2", 6"*

PROFILES AVAILABLE – in 8' or 10' lengths

READY-ANGLE®

Ready-Angle® adapts to almost any shape and curves in multiple directions at the same time so it's easy to form challenging compound curves and s-bends. You can also use two pieces of Ready-Angle® to create curved tracks for steel and wood studs. With Ready-Angle®, you can quickly form arches of any depth.

APPLICATIONS – Ideal for s-shapes, spirals, sweeps or virtually any free-form shape.

STANDARD SIZES – 1 1/2" x 1 1/2"

PROFILES AVAILABLE – in 8' or 10' lengths

READY-ARCH®

Without any tools you can quickly create round, elliptical or s-shapes right at the jobsite. Use convenient and economical Ready-Arch® to create any curved shape for attaching steel or wood studs. Stocked at your local distributor, there is no lead time, and you can easily adapt to changing variables.

APPLICATIONS – Ideal for soffits, arches, light coves and elliptical and eyebrow curves for window and doorways. Ready-Arch® is the solution whenever you need material curved the easy way along the web.

STANDARD SIZES – 3 1/2", 3 5/8", 5 1/2", 6"

PROFILES AVAILABLE – in 8' lengths

READY-HAT™, READY-TRACK®, READY-ANGLE®, & READY-ARCH®

PRODUCT SPECIFICATIONS

ASTM A653 galvanized steel 20 ga (*18 ga)
ASTM A653 coating designation G-60

MINIMUM RADIUS CAPABILITY

Minimum radii range from 10"–20"
