

NATIONAL GYPSUM PRODUCTS SUSTAINABLE FEATURES

The following information is applicable for products manufactured by National Gypsum at these plant locations. The sustainable features listed can be used in achieving credit towards all sustainable construction practices. National Gypsum manufacturing facilities are referenced below. If your project is located within 500 miles of the manufacturing facility, additional credits can contribute to your project. Accountability for all sustainable calculations is the responsibility of the architectural firm or consultant on the project.

Gypsum Board Plants
